

MSA	Voltage	Size mm	Kg
19.910	Dual 115 - 230 V	155 x 172 x 55	1.235

Electronic device for the detection of magnetism in μ Tesla, demagnetization and control of magnetic remanence of watches, movements, tools and watch parts.

Functions :

- DETECT** - Magnetism detection
- DEMAG** - Demagnetization
- <->** - Automatic mode activated
- Speaker icon** - Activate or deactivate the sound
- Power plug icon** - Connected to the power sector 115 - 230 V
- Battery icon** - Operates on the battery
- Compass icon** - 1. Compass mode display.
2. Calibration of the north of the compass
- Home icon** - Return to the main menu
- Settings icon** - Parameters/settings
- MUTE** - Selection between silent or sound mode
- INFO** - Display of the hardware and software version
- RESET** - Resetting the sensors
- AUTO** - Activate or deactivate the automatic mode.

Sensors : there are 5 sensors and one of them is located in the centre of the detection surface. The others are located in the corners of a 1.5 cm square. They can measure the magnetism force as well as the position. A dot on the LCD screen shows a sensor with its position and the dot size is proportional to the magnetic force.
